Continued....

- Air Quality Trail
- Local Air Quality Awards
- North West Public Health Awards

Tony Sherlock

“I’m thrilled that the work of the Forum has been recognised in this public health arena. Management of air quality is crucial to public health alongside ensuring that the public is well informed about the truth behind vehicular and industrial impacts on their communities. The partners have worked well together on a series of projects delivered by the Forum and this has developed trust both within the partnership and the wider community”
